

BREAST PROCEDURES

BREAST AUGMENTATION & BREAST LIFT

THE PLASTIC SURGERY CENTRE

THE PLASTIC SURGERY CENTRE

Our unique, fully accredited facility is housed within a private building in downtown Calgary – one of the finest in Canada. It is architecturally designed for discreet and personalized care.

“Whether you have been thinking about cosmetic surgery for a while, or have just started to consider your options, it is a big step and should not be taken lightly.

A small change on the outside can create extraordinary change on the inside, changing the way you feel about yourself.

We help ensure you are confident and comfortable in any decision. We believe it is important to take the time to explore your individual options and to discuss realistic expectations and desires to help you make the right choice for your best outcome.”

— DR. GREG WASLEN

CONSIDERING PLASTIC SURGERY? YOUR MOST IMPORTANT DECISION IS CHOOSING A SKILLED, REPUTABLE PHYSICIAN AND A FACILITY RENOWNED FOR ITS ATTENTION TO DETAIL AND PERSONAL SERVICE.

THE PLASTIC SURGERY CENTRE IS THAT FACILITY.

BREAST PROCEDURES

The Plastic Surgery Centre is a team of experienced and skillful providers. We have been fulfilling the expectations of clients since 1995. Our hallmark is a unique ability to individualize to the needs of each client — their anatomy, shape, size and skin quality. In the case of breast procedures, there are various implant sizes, contours and textures that must be considered to correctly provide the optimal result. The Plastic Surgery Centre offers two main types of breast procedures, lifts and augmentations.

Saline implant, 475 cc, below the muscle

Silicone implant, 450 g, below the muscle

Silicone implant, 500 g, above the muscle

Saline implant, 300 cc, above the muscle

PROCEDURE INFORMATION

BREAST LIFT

A breast lift raises the breasts by removing excess skin and tightening the surrounding tissue to reshape and support the new breast contour.

BREAST AUGMENTATION

Also known as augmentation mammoplasty, breast augmentation surgery involves using breast implants or fat to increase the size of your breasts or restore breast volume.

Breast procedures can:

- » Increase fullness and projections of your breasts
- » Improve the balance of your figure
- » Enhance your self-image and self-confidence
- » Correct severely drooping breasts

CONSULTATION

A PERSONAL CONSULTATION IS YOUR FIRST STEP

Consultations at The Plastic Surgery Centre are personalized to your unique requirements and questions. We review actual breast implants, before and after photography, digital imaging of your photographs and possibilities, and your physical and digital measurements. We will also provide information on fees, financing options, timelines, recovery expectations, and other details. There is a fee for consultations at the Plastic Surgery Centre.

OUTCOMES & EXPECTATIONS

As a leader in plastic surgery services in Canada, the Plastic Surgery Centre and Dr. Waslen will not recommend, or undertake, any surgery that is not appropriate for you. We will provide recommendations during our Consultation period to ensure results match your unique requirements. Clients of the Plastic Surgery Centre have reported that their change on the outside has created extraordinary change on the inside.
